WOLFGANG NIEFERT

REVIEWER GUIDE AND RESOURCES

This information page is designed to assist reviewers with quick information to grasp the **core concept** or the book and also provide background information about the **vision behind the content**. Finally additional links are provided to help with linking and marketing.

BUSINESS INTELLIGENCE WITH SAP BI

PUBLISHER ESPRESSO TUTORIALS
DE AND USA WWW.ESPRESSO-TUTORIALS.COM

Espresso Tutorials is specializing in SAP related knowledge areas. They have established a vast library of distinct books that fill the knowledge gap with easy to understand content.

WHY BOOK QUICK SUMMARY
WHAT SAP BI AND MORE

The author takes the reader on a **journey to create a BW architecture** without the use of the SAP BW solution. Rather he uses minimal tools that are already built-in with SAP. On this skillful path the reader understands the **innner workings of SAP.** While "Re-Inventing the wheel of BW" many SAP products such as **HANA** and the like are discussed and positioned within the SAP solution architecture. The author questions the usability of the overly complex SAP architecture where complexity is addressed by yet another SAP BI product. He challenges this complexity with a custom solution that is designed to be operated by a single consultant, but leverages modern collaboration. The reader benefits with a unique perspective of BW and BI. **The takeaway: The knowledge and capability to appreciate SAP BW and skills to design your own BW.**

REVIEWER RESOURCES

STYLE QUICK FACTS
KEY POINTS BI AND SAP AS A JOURNEY

What if there was no team of experts and consultants? You are a single consultant and need results today. Learn how to navigate in SAP, trace transactions, audit as well as run reports.

CORE REVIEWER FRAGMENTS
MESSAGE SAP INTRODUCTION AND BI ARCHITECTURE

You learn everyrhing the author wished he had known the first time he was left alone with a reporting task for SAP R/3. Understand what new SAP BI technologies contribute to the modern BI Architecture. Understand: Don't buy everything SAP offers.

NOW BEYOND THE BOOK
AND NEXT COLLABORATION WITH REPORTING SNIPPETS

The author suggest that common reporting logic can be extracted in SAP and stored as open source snippets. This can leverage your own reporting project and could evolve into a competitive custom BW using the BW Bootstrapping concept.
